INTRODUCTION

In semantics there are some aspects and researcher takes aspects of lexical and contextual meanings as the basis for this research. According to Chaer (2012) lexical meaning can be interpreted in accordance with the referent or in accordance with the results of observation of the sensory or meaning that is real in everyday life. And contextual meaning is the meaning that corresponds to the context of the word that appears as an additional meaning in addition to the actual meaning of the impression caused by a particular situation (Nawaristika, 2012). From the meaning of lexical and contextual meaning can be concluded that the lexical meaning is a word that has a meaning not true. And contextual meaning is a meaning appropriate to the context of the actual

situation.

Snow White is a fictional character and the main character of Walt Disney's first animated film, Snow White and the Seven Dwarfs. She is also considered to be the first member of the Disney Princess group. Snow White ((German): Schneewittchen) comes from the famous fairy tale from Europe, the most famous version of which is the collection of the Brothers Grimm. In Indonesian, Snow White is known as White Snow. The voice of Snow White is Adriana Caselotti in Snow White and the Seven Dwarfs. As for the Indonesian version, it is filled in by Apriliana Suci Ariesta, Snow White wore two dresses in the original film. First, a brown maid dress with white sleeves and a torn skirt with patches of cloth. The headband is dark blue. Second, a blue top with a white collar and light blue sleeves

with red decorations in the form of large water drops, each sleeve has three. The skirt is yellow (trinkets) or cream (film). The headband is red. He also wears light brown shoes with yellow ribbons. Snow White had "lips as red as roses, hair as black as ebony, skin as white as snow" as the Evil Queen's magic mirror put it. Although it is never mentioned, Snow White's lifespan is fourteen years. Snow White is also the shortest Disney Princess. Snow White is shown to be very kind, innocent, and cheerful. Snow White was never angry even at the Evil Queen. Snow White is close to the animals. He is also friendly, diligent, and somewhat shy. Snow White loves to sing and cook. Snow White cares for her parents, even though the grandmother turns out to be evil. Snow White can make people like her, just like Grumpy can't help but like her. Snow White is also the softest and sweetest Disney Princess and the only one who ever prayed.

In communicating, between speaker and speech partners sometimes misunderstanding occur. This is because there are differences in the messages conveyed so that the meaning of the language expressed by the speaker is not in accordance with the response of the listener. The difference in response to meaning can occur because a word or a sentence can have several meaning. The meaning associated with morphemes and

words are called lexical meanings (Chaer, 2012:45), lexical meanings are actual meanings, meanings that are in accordance with the result of our sensory observations, or meaning as they are, while contextual meanings are the meanings of a lexeme or words that are in one context (Chaer, 2012:289).

Contextual meaning is the meaning of words according to the situation in which they are used (Lyon, 1984:140). Different situation gives different meaning. On other hand, in the particular situations the sentences will be equal in meaning. In addition contextual meaning also defined as the information signaled about the kind of use a linguistic unit has in its social context (Crystal, 1991:79).

Contextual meaning is the meaning of a lexeme or word inside a context. A contextual definition is also a definition in which the term is used by embedding it in a larger expression containing its explanation. According to Parera (2004), contextual meaning could be regarded as a situational meaning. It arises as a result of the relationship between speech and context. Chaer (2012: 290), states that expressing contextual meaning is the meaning of a lexeme or word that is in one context. Contextual meaning (situational meaning) appears as the result between statements and context (Pateda, 2001:116). Thus, the context has its role to give the

meaning. The meaning of words cannot be separated from cultural environment and ecology of the speaker (Parera, 2004; 47). This statement is supported by Malinowski who states that the word will not have meaning when it is separated from its context (Parera, 2004).

RESEARCH METHOD

Descriptive qualitative research was applied in this study. The qualitative research is used to investigate the social phenomenon (Trochim and William, 2006). Descriptive qualitative is one of the research procedures which produce descriptive data in form of speech and the behaviour of those being observed (Bogdan and Taylor, 1992). For this case, Bogdan and Biklen (1982) recommended the characteristic of qualitative research has the natural setting and the researcher as a key instrument. It means that the researcher is an actor to collect the data (Moleong, 2005).

FINDINGS AND DISCUSSION

1. Findings

The data for this research was collected from Snow White and The Seven Dwarfs movie. This research revealed that contextual meaning on snow white are:

- a. Quen :” Oh snow god, I wish that I had a daughter”. Duration 0:58 / 15:32

Analysis: (Oh) is an exclamation variously expressing disbelief, frustration, excitement, or anger. Its abbreviation, OMG, is widely used in digital communication. Related words: omfg. oh em gee.

- b. “As they were preparing for the baby coming”. Duration 1:45 / 15:32

Analysis: (As), A descriptive superlative; a simile without the comparison.

- c. “ the sun was shining like it had to melt the entire winter snow that day” duration 1:53 / 15:32

Analysis: (entire) The whole of something, not one piece, but the complete thing.

- d. king :” I will fulfil your every wish” duration 2:14 / 15:32

Analysis: (fulfil)To complete or finish

- e. king :” I will fulfil your every wish” duration 2:14 / 15:32

Analysis: (fulfil)To complete or finish

- f. king : “oh my darling” duration 2:58 / 15:32
